

VIRAL GHORI

Mobile Application Developer | Software Engineer | Frontend Developer | AI Engineer | Data Analyst

147 Titirangi Road, New Lynn, Auckland | +64 22 555 0070 | viral.lathiya.iosdev@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | Valid NZ Work Visa

PROFILE SUMMARY

Frontend Engineer has over 6 years of experience designing, building, and maintaining high-quality cross-platform mobile and web applications using Flutter and Dart. Delivered scalable, efficient, and user-centric solutions across fintech, e-commerce, wellness, IoT, and a globally used meditation app and a white-label e-commerce platform serving hundreds of businesses. Experienced integrating RESTful APIs and GraphQL with backend services, writing clean testable code, and working in agile cross-functional teams. Familiar with React Native and comfortable using AI-assisted tools across the development lifecycle. Based in Auckland and ready to contribute from day one.

CORE SKILLS

Flutter and Frontend Development

- Flutter and Dart - cross-platform mobile (iOS and Android), web, and desktop applications
- State management - GetX, Riverpod, Bloc, Provider
- Responsive design, custom widgets, smooth animations, and platform-adaptive UI
- Modern UI practices - accessible, visually polished, and user-centric interfaces
- React Native - additional cross-platform mobile development experience
- Figma and Adobe XD - design collaboration, component review, and prototyping

API Integration and Backend Connectivity

- RESTful API integration - standardized, reliable data exchange with backend services
- GraphQL - efficient querying and data management across large-scale platforms
- Firebase - Firestore, Auth, Realtime Database, Cloud Functions, Push Notifications
- Third-party integrations - payment gateways, Adjust SDK, Spotify SDK, Google Sign-In, IoT socket

Engineering Practices and Tooling

- Unit testing, widget testing, and integration testing in Flutter
- Performance optimization - identifying bottlenecks, improving scalability and load times
- Git, GitHub, Bitbucket, and CI/CD
- Fastlane - automated build and deployment pipelines
- Agile/Scrum - sprint planning, stand-ups, cross-functional collaboration
- AI-assisted development tools - using AI across the SDLC to improve quality and productivity
- Jira, VS Code, Android Studio, Xcode - project tracking and development environments

WORK HISTORY

Senior Flutter Developer | BillionBright Solutions LLP (Rupeecom) *Apr 2023 - May 2026 • Part-time*

- Built and maintained Flutter mobile apps for hundreds of small business clients on the Rupeecom e-commerce platform
- Developed a white-label app system - each client gets their own branded Flutter app from one shared, scalable codebase
- Integrated RESTful APIs for order management, live delivery tracking, inventory, and PhonePe payment gateway
- Built and maintained the customer app and delivery boy app as separate, fully tested Flutter applications
- Implemented push notifications and Shopify integration for product data sync across platforms
- Set up Fastlane CI/CD pipeline to automate builds and releases across multiple client apps
- Optimised app performance and resolved defects across all live client applications

Freelance Developer | Self Employed *During Study & Spare time • Freelance*

- Designed and built a complete ride booking app independently - planning through to delivery
- Built and integrated modules for rides, drivers, earnings, payments, reminders, and reports
- Integrated Firebase for real-time data sync, authentication, and backend management
- Built custom reminder system - users set pickup alerts at 15 min, 30 min, or a custom time

- Implemented automatic device calendar sync - booked rides appear directly in the user's calendar
- Added push notifications for ride updates, driver arrival, and reminder triggers
- Managed all client communication and delivered the full project independently

Flutter Developer Intern | AffordIT, Auckland (Mount Roskill) Feb 2025 – Aug 2025 • Internship

- Built a full cross-platform Flutter app from scratch, delivered to production standard
- Integrated Firebase (Auth, Firestore, Cloud Functions) for real-time data and authentication
- Connected Spotify SDK and Google Sign-In APIs, enabling reliable third-party authentication
- Designed and built smooth UI animations, improving user engagement and overall app feel
- Participated in agile sprint meetings - stand-ups, planning, and reviews

Customer Service Representative | Cinnabon – Newmarket, Auckland Dec 2024 – Dec 2025 • Part-time

- Delivered consistent customer service in a fast-paced retail environment
- Processed orders using a POS system and maintained food safety standards

IT Support Engineer Intern | Snapdeal – Onehunga, Auckland Feb 2024 – Jul 2024 • Internship

- Provided technical support and resolved user issues efficiently
- Managed professional communications and delivered administrative support

Senior Flutter Developer | Sav Technologies – Dubai Apr 2022 – Apr 2023 • Full-time

- Built a fintech Flutter app (Sav: Savings & Rewards) from scratch, launched live on iOS and Android
- Integrated REST APIs, secure payment gateway, Adjust SDK, Google Analytics, Facebook Ads, and KYC
- Improved app performance and implemented security features protecting the financial data of users
- Translated business requirements into scalable Flutter solutions

Flutter Software Engineer | Insight Timer – Australia (Remote) Jul 2020 – Apr 2022 • Full-time

- Maintained and improved the world's #1 free meditation app
- Built features including live teacher hosting, group chat, daily check-in tracking, and user profiles
- Improved app performance by identifying and resolving bottlenecks
- Collaborated with design, backend, and product teams in a fully remote agile environment

Junior Flutter Developer | Avinashi Ventures – India May 2018 – Jun 2020 • Full-time

- Pioneered Flutter cross-platform development in the organization - including desktop app
- Built BookMyFarm (Razorpay payments), Comfortick (IoT socket control), Amity BizNet (GraphQL), and Bluetooth Printer App
- Built iOS native apps in Swift, integrated IoT hardware, and trained 3 Flutter interns

EDUCATION

Master of Information Technology | Auckland Institute of Studies, NZ Graduated May 2026

- Major courses: AI, Data Mining, Advanced Software Engineering, Data Analysis
- Projects: Expense Management web app, Python data analysis, machine learning models, Resume Analyser (React Native)

SELECTED PROJECTS

AgriBot — Agriculture AI Assistant

- Self-directed AI integration project — built a domain-scoped agricultural AI assistant using Flutter frontend connected to an LLM API
- Designed a strict prompt engineering system that detects and politely declines any question outside agriculture (crop health, soil, pest control, irrigation)
- Cross-platform app (iOS, Android, Web) with offline-friendly caching for low-connectivity rural areas
- Technologies: Flutter, Dart, LLM API, REST, Prompt Engineering, Firebase

Rupeecom — White-Label E-Commerce Flutter Platform

- Scalable Flutter platform serving hundreds of businesses - REST APIs, order management, live tracking, PhonePe payments

Ride Booking App — Freelance Project

- Full Flutter app - rides, drivers, payments, reminders, Firebase, push notifications, device calendar sync

Sav — Savings & Rewards (Fintech)

- Fintech app live on iOS and Android - REST API, payments, KYC, analytics, 10,000+ users

Insight Timer — Global Wellness App

- 10M+ downloads — live events, group chat, audio, progress tracking, Firebase Realtime Database

BookMyFarm | Comfortick (IoT) | Amity BizNet (GraphQL) | Bluetooth Printer App

- Cross-platform Flutter apps - property booking, IoT AC control, GraphQL B2B networking, QR billing
